Invitation to the
SET-Plan Implementation Working Group 4
2nd Symposium
on Interoperability + Data Spaces

Dear experts and policy makers in the field of digitalisation,

Interoperability is a key factor in digitalisation. Harmonised technical standards are essential for cost-effective system integration. Join us for an insightful exploration into interoperability testing and innovations in digitalisation. This event provides a platform for industry experts, researchers, and policy makers to exchange ideas, engage in discussions, and shape the future of energy.

🗓 **Date: June 6th 2024, 10:00 – 16:00 CET**
Location: TCC Trieste Convention Center, Italy

🌐 **What to expect?**
Cross-Sector Collaboration: This year, we are collaborating with the IHE Connectathon 2024[1], organized by "Integrating the Healthcare Enterprise" (IHE[2]), a global healthcare initiative. This cross-sector collaboration draws inspiration from the successful implementation of interoperability in the health sector and applies it to digitalisation across industries.

🎯 **What's on the Agenda?**
Symposium: Have a look at the efforts for interoperability of data spaces in different sectors and for the energy sector in Europe, and see the opportunities of interoperability testing.
Test floor visit: Get an exclusive glimpse of the spirit and results of the interoperability test events, which are aimed at participants from different backgrounds.
Networking Reception: Make valuable connections with other thought leaders, executives and innovators from a variety of sectors.

🚀 **Who is organizing it?**
The **European Collaboration Network for Interoperability Testing** is a **lighthouse activity,** of ERA Net EnerDigit[3] and the CETP – Clean Energy Transition Partnership[4], aiming to establish a forum for information and knowledge exchange about interoperability and its testing.
The **European Project int:net[5]** has the objective of building an interoperability community. Our common vision is to accelerate digitalisation processes in the energy sector on a European level through cross-sector collaboration of experts.

For more information about interoperability test events, refer to the IHE-Europe Whitepaper on Connectathon[6]. Learn more about achieving interoperable solutions through our explanatory video[7].

We look forward to your valuable presence at the Symposium on Interoperability and Data Spaces, as we work together to shape the digital future of the energy and other sectors. Please register here.

Warm regards,
Angela Berger (angela.berger@ffg.at)   Antonello Monti
Lead   Coordinator
European Collaboration Network   Project int:net
for Interoperability Testing

Preliminary agenda

SET-Plan Implementation Working Group 4
2nd Symposium
on Interoperability + Data Spaces

6th June 2024, Trieste

Session on strategic aspects of interoperability testing and data spaces
The symposium is designed for experts and policy makers to share experiences across sectoral boundaries. Learn about the importance of interoperability in general and for the current development of data spaces in different sectors in Europe.

starting at 10:00 am

Welcome
- Keynote to the vision of digitalisation, Alexander Markowetz
- Activities on the European SET-Plan, Implementation Plan SET-Plan Action 4
- Introduction of activities in the energy sector, CETPartnership and project int:net

Data Space Development in the different sectors
- Healthcare:
  - myHealth@EU
- Energy:
  - EDDIE: Georg Hartner
  - OMEGA-X
- Public Services:
  - X-Road: Petteri Kivimäki, CTO, Nordic Institute for Interoperability Solutions (NIIS)
- Transportation: (requested)
- Cross sector exchange

Lunch break

Behind the scenes tour (IHE) Connectathon test floor
- VIP Tour on IHE Connectathon test floor and Energy projectathon test floor

Interactive Session on practical views to interoperability testing
- experience of interoperability testing of the different sectors
- Energy, Healthcare, Transportation, Public Services

Coming Activities on European level for accelerating interoperability
- European Calls on interoperability topics
- CETPartnership 2024 Call Module CM01 Interoperability and Data Spaces
- Collaboration of projects

Ending at 4 p.m.

Participation is free, please register [here](#)
